

NASA did not provide any specific answers from section A. Rather they used nominal data to compile the data found in the first eight columns of the spreadsheet.

NOTES:

Following columns from Section B were not included in the CAPBOR spreadsheet:

- ER1.ata OTHER- no random IDs
- ER4i.ata\_2 Raw Data 12
- ER4i.ata\_3 Raw data 13
- ER4i.ata\_4
- ER4iata OTHERS - no random ids
- ER5.f.1
- ER5.f.2
- ER5.f.3
- ER5.f OTHERS - no random ids

The ones with random IDs could be added fairly easily, but they don't seem to add much value, and I just got sick of looking at the thing.

Section C data not included except for free-form answers. Might add later.
